Neighbour's Project Update

Tuesday 11 December 2018, 5.30pm, Toolooa Reservoir

RSVP: bkasper@gawb.qld.gov.au or 4976 3000 by 5pm 4/12/18

Testing and Commissioning Update

Golding Contractors have now demobilised from site and we have been undergoing testing and commissioning since September. Testing and commissioning involves running the facility under a number of different conditions in order to understand ideal operating modes and set limits of operation.

One of those limits is the 'dead storage' which was reached in early November and saw the storage drained to nearly empty. As of Monday 12 November, the storage commenced filling again and we expect to be at full capacity again in early January.

Neighbour's Project Update

The next Neighbour's Project Update will be held back at the Toolooa Reservoir at 5.30pm on Tuesday 11 December. ***At this update we will:***

- Introduce you to the key Operational Team staff who will be responsible for the facility moving forward
- Discuss the testing and commissioning phase and expected timeframes for completion
- Discuss expected ongoing operational schedule
- Discuss our strategy for recreational use of the facility.
